-Overview:

The eCommerce market has evolved from a simple concept of brick-and-mortar retail to a shopping ecosystem that involves multiple devices and store concepts. Many players from both online and offline retail are moving towards multi-channel strategies and are continuously reinventing the way we shop online. Expectations are growing rapidly as customers discover more convenience on all levels.

-The Problem:

What is our Current State of Business?

What about our Customers Satisfaction?

Three Areas to be Improved

Solutions:

ZA e-commerce have started in October ,2016 with only 388 Order passing through 2017 with around 53k order , in 2018 we have reached 63k Order around Country with total Products 32k and around 95k Customers , Total Revenue earned from 114K Delivered orders is \$19.64M

Credit Card is our Customers preferred payment type by 75% from our total transactions.

Most Revenue is generated by Health and Beauty Category with around \$1,659,433M in 3 Years from 71 Total Category.

Our Customer Satisfaction is affected by 2 main reasons , Most of cancelled orders have been cancelled because of high Delivery days (with average 18 days) and second reason is the huge difference between estimated delivery date and actual date.

-Out of 27 States we have many states that have very high average of delivering orders which leads to low review scores in these States.
